

Use Case Diagram Activity Worksheet

Instructions:

1. Read the story below carefully.
2. Identify the actors and use cases.
3. Decide which use cases are <<include>> (mandatory) and which are <<extend>> (optional/conditional).
4. Draw your Use Case Diagram in the blank space provided.

Story: Online Shopping System

1. A Customer logs into the online shopping system.
2. The customer searches for products and can add items to the shopping cart.
3. To checkout, the system always requires:
 - Verify user identity (include relationship)
 - Process payment (include relationship)
4. During checkout, the customer can apply a discount coupon (extend relationship).
5. If the payment fails, the system may offer an alternative payment method (extend relationship).
6. A Customer Service Representative can also assist with checkout if needed.
